WORDS BY EMILY MARTIN

**1 Portfolio by Moduleo**  
Portfolio offers a bespoke flooring design solution. 'Portfolio will give designers working on any major projects an exclusive opportunity to create their exact vision,' says David Bigland, managing director at Moduleo UK and Eire. With its European-located factory, sample turnaround can be delivered 'within a few weeks'. [moduleo.co.uk](http://moduleo.co.uk)

**2 Love Seat by ercol**  
ercol is celebrating the 50th anniversary of its iconic Love Seat with the launch of a limited-edition version in red, marking St Valentine's Day, with a certain appeal to couples. Designed by ercol founder Lucian Ercolani, it was debuted in 1956 as part of the Windsor Collection, and has been in production ever since. [ercol.com](http://ercol.com)

**3 The Lighthouse by Christopher Jenner**  
Designed with the objective to create a light that used the least energy input to deliver the most reflective output, Lighthouse is a hand-blown and cut-crystal table lamp. Made in the Lake District and presented on a marble plinth, the light employs an eco-conscious 5W LED circuit reflected through a circular lens, as in a lighthouse. **4 Eggy by Buzzi & Buzzi**  
Designed by Stefano Dall'Osso, the LED light Eggy features an egg-shaped form making it ideal for an 'organised disorder' lighting scheme. The fully recessed unit is made using the patented AirCoral, a material created and patented by Buzzi & Buzzi. Its properties include anti-bacterial, photo-catalytic and anti-pollution qualities. **5 3D Pixel by Baux**  
Baux has launched a collection of acoustic wall tiles and panels, allowing for imaginative wall designs. 3D Pixel comes in three thicknesses and several colours to aid a pixilated effect. Constructed using wood wool, each tile is lightweight, while maintaining heat-insulating and sound-absorbing qualities. [baux.se](http://baux.se)
